

ERIC SIA

Senior Full Stack Engineer | Dual Bachelor's in Artificial Intelligence

📍 Kuala Lumpur, Malaysia | ericsiadelong@outlook.com |
+60 16 6956139 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **4+ years of experience** delivering **enterprise-grade systems** using **React, Spring Boot, and AWS**. Specialized in **system modernization, microservices architecture, and cloud-native deployments**. Proven track record in **leading technical initiatives, driving platform migrations, and enabling international product expansion**. Strong background in **scalable backend design, DevOps automation, and production system stability**.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, Vue.js, Progressive Web Apps (PWA)

Backend & Architecture: Java, Node.js, Spring Boot, Microservices, RESTful APIs, JPA/ORM, MyBatis

Databases: MySQL, PostgreSQL, MSSQL, SQLite, DB2, Redis

Cloud & DevOps: AWS (Server & Serverless & ECS & EKS), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions, Docker Compose), Git (GitHub, GitLab)

Programming & Data: Python, R, Machine Learning, Image Processing & Computer Vision

Mobile: React Native & Expo Go, Kotlin, Android Studio

PROFESSIONAL EXPERIENCE

Senior Executive – Full Stack Engineer

OpenMove AI Bhd | Selangor | Oct 2024 – Present

- **Designed and proposed AWS architecture** for production applications, and developed enterprise platforms including CommissionSuite and franchise management systems using **React, Spring Boot, and PostgreSQL**.
- Conducted technical R&D and PoC implementations to explore **new business opportunities**.
- **Introduced Docker-based containerization** and modern deployment workflows to **improve scalability and reliability**.

- Facilitated **knowledge transfer** by preparing tutorials and **coaching sessions** for developers on new tech stacks.

Key Achievements

- Built CommissionSuite, **enabling international expansion** to Thailand, **increasing revenue**, and **unlocking new market opportunities**.
- Delivered a COO-led PoC **that secured customer approval and additional business**.
- **Secured company approval** for a new tech stack (React + Spring Boot + PostgreSQL) for new projects, **successfully implementing it in production** and proving its effectiveness in scalability and maintainability.
- Strengthened internal capabilities through developer **coaching** and structured **knowledge-sharing initiatives**.

Software Engineer

Plaza Premium Group | Selangor | Apr 2023 – Oct 2024

- Developed backend services using **Java Spring Boot** within **microservice architecture**.
- Built frontend systems using **React, Angular, Vue and PWA**.
- Deployed cloud services on AWS using **CI/CD pipelines (Jenkins) & AWS CLI**.
- **Maintained production systems** and **resolved critical issues**.

Key Achievements

- **Fixed a critical production issue** in the **Smart Traveller mobile app** (React Native).
- Migrated **Smart Traveller Admin Portal** from Angular 5 to latest Angular LTS.
- Developed features for a **PWA POS system** used in retail operations.
- **Built serverless AWS** API integration portal for internal and client developers.
- Implemented Redis-based queue system on **AWS EC2**.

IT Intern

Matrixstudios | Kuala Lumpur | Apr 2022 – Sept 2022

- Developed **Next.js** landing page for marketing campaigns.
 - Implemented **Zapier + Odoo automation** for social media workflows.
 - Assisted team development and help new interns.
-

PERSONAL PROJECTS

新プル Group – Product Landing Platform

Tech: Next.js, Custom Domain Deployment

- Designed and deployed the official landing website for 新プル Group with a custom .com domain.
- Built a modern product showcase platform highlighting developed applications.
- Implemented responsive UI, SEO-friendly structure for product discovery.

新プル Booth – iOS POS System for Booth Businesses

Tech: React Native, Expo Go, iOS in-app-purchase, Premium Feature Subscription

- Developed a mobile POS system tailored for small-to-medium event booths such as cosplay vendors and gaming merchandise sellers.
- Implemented product management, order tracking, and booth-friendly sales interface optimized for fast transactions.
- Designed a **premium subscription model** unlocking advanced features and analytics for vendors.

Ameiro 雨いろ – Weather Web Application

Tech: Next.js, External Weather API, REST Integration, Secret Management

- Built a weather monitoring web application that fetches real-time worldwide weather data from external APIs.
- Designed a clean UI to visualize location-based weather information and forecasts.
- Implemented API integration and asynchronous data handling.

Kiro Note 記録ノート – Todo Management Web App

Tech: Next.js, State Management, Local Storage

- Developed a productivity web application for managing personal tasks and priorities.
- Implemented task creation, status tracking, and interactive UI components.
- Designed responsive layouts for desktop and mobile usage.

EDUCATION

Bachelor of Computer Science (Hons) in Artificial Intelligence

Asia Pacific University of Technology & Innovation

CGPA: 3.51 | Apr 2020 – May 2023

AI-focused degree covering machine learning, algorithms, data structures, and software engineering principles.

Final Year Project: Developed an individual full-stack system using **Flask (Python), MySQL, HTML, and CSS**. The project emphasized backend development and machine learning model implementation, with an integrated user interface.

Bachelor of Computer Science (Hons)

De Montfort University

CGPA: 3.42 | Apr 2021 – May 2023

Dual-degree program emphasizing software design, analytical thinking, and industry-standard development practices., demonstrating consistency in meeting international academic benchmarks.

GCE A-Level (Accounting & Information Systems)

Desa Mahkota Sixth Form College

First Class | May 2018 – Dec 2019

Built foundational knowledge in accounting principles and information systems, enhancing analytical and structured problem-solving skills.

CERTIFICATIONS & AWARDS

Journal Publication – *Modified Artificial Bee Colony for N-Queens Problem*

Published in Asia Pacific University of Technology & Innovation Journal (JATI).

- <https://jati.apu.edu.my/index.php/JATI/article/view/156>
- https://www.researchgate.net/publication/399853370_A_modified_artificial_bee_colony_for_N-Queens_problem

MUET Band 4

Recognized proficiency in English communication and academic writing.

PROFESSIONAL DEVELOPMENT & ACTIVITIES

OWASP Top 10 & Secure Coding Practices Training – Conducted by LGMS Berhad

Strengthened knowledge in application security, secure coding standards, and common web vulnerabilities.

AWS Workshop – Building Cost-Aware SaaS Architectures (Multi-Tenant Visibility & Optimization) – Amazon Web Services

Gained insights into cloud architecture design, cost optimization strategies, and FTR (Foundational Technical Review) report concepts.

AWS Workshop – Kiro CLI & IDE – Amazon Web Services

Exposure to modern cloud development tools and workflow optimization.

Kechara Food Bank Volunteer Program
